DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of the Restriction Requirement in the reply filed on October 19, 2004 is acknowledged. The traversal is on the grounds that a reasonable number of species are set forth in the present application. However, this argument is not found persuasive because the species found in the present application are patentably distinct. Therefore, the requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 6-7, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Aronoff et al (US. Pat. No. 5,107,866).

Aronoff et al discloses all that is recited in the claims (Note: Hot-melt adhesive can be applied in a spiral manner, if desired, which corresponds to the claimed "pattern having loops". See fig. 2-3 and col. 2, lines 25-30, 58-59; col. 3, line 5-20, 55-68).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1731

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 11-13, 16-17 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aronoff et al (US. Pat. No. 5,107,866).

While Aronoff et al may not specifically recite the specific steps involved in the production of the cigarette filter of Aronoff et al, it would have been obvious to one having ordinary skill in the art at the time of the invention to have fabricated the filter in this manner, since the recited steps (i.e. supplying filter rod and paper web to wrapping section, wrapping said filter rod in the paper and cutting the filter rod into filter plugs) are conventional in the making of cigarette filters.

Regarding claims 19, it would have been obvious to one having ordinary skill in the art at the time of the invention to provide for a lap-seam adhesive only, at the seem, to properly seal the combiner wrap at the seem to provide for additional security of the wrap to the filter material.

Allowable Subject Matter

6. Claims 10 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
